STRADUS™ LITE – OEM LASER HEAD

Low Cost Without Compromise

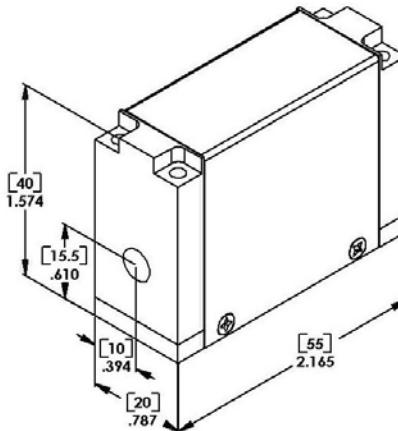

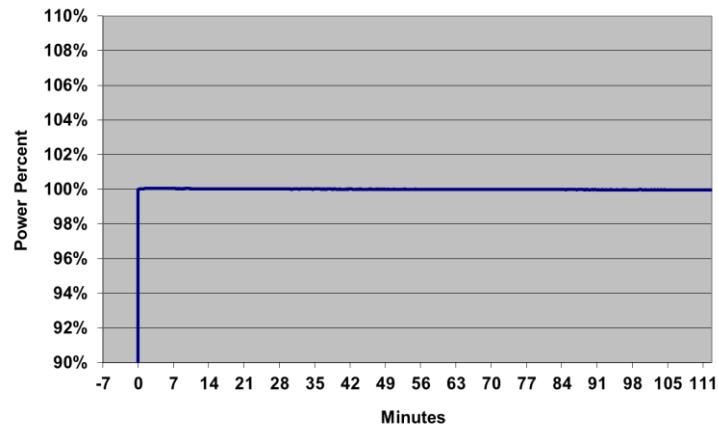

The Stradus™ Lite diode laser module is the economical version of the standard Stradus™ laser module. The Stradus™ Lite features a much smaller footprint, higher efficiency, and the same excellent performance. It is a CW mode operation only with microprocessor control with no external electronics required. This smaller, cost sensitive solution uses all of the technology from our full featured Stradus™ laser modules in the smallest footprint available for a high performance laser module system. Just supply DC current and the Stradus™ Lite does the rest.
